In place and promotion aspect,the agreement levels were at highest levels,respectively,from the hypothesis testing,personal factors in gender and education level were not different.in term of age, it showed different at the significance level of .002 .in term of occupation, it showed difference at the significance level of .038 .in term of monthly income, it showed difference at the significance level of .028 .marketing mixes had relationships on wedding service purchase decision making at the significance level of 0.01 .

For suggestions,wedding service distributors should pay more attention on products and reasonable and negotiable price,company should be available,staffs should have professional knowledge and ability to introduce products with good service to serve customer's demands

Keywords: *Wedding Consumption*

1. Introduction

With the development of China's national economy and the improvement of people's living standards, more than 10 years of China's wedding industry development from the beginning of messy early-stage growing into large-scale progress gradually. Wedding has become a display platform about people's consumption taste from the wedding dresses, wedding photography, wedding services, wedding banquet, jewelry and so on ,each choice makes everyone wants to have a unique wedding.On the other hand the wedding group in 80 s and 90 s as the main force, has their own unique understanding and ideas for the wedding, they pay more attention to the wedding spiritual expression of content elements.To satisfy the diversified modern youth, vogue, individuation, the pursuit of romantic ."one-stop wedding service" which provide all the wedding process services you need by a team, now has become an important link of the wedding ceremony.

The GU-PHOTO wedding company was founded in 2006.After two years of development they officially registered for the wedding service co., LTD.,in 2008. GU-PHOTO company is located at center street in Kunming, the company's decoration is very nice with 180 m².In addition there is a warehouse to hold wedding tools and photographic equipment. They mainly provide wedding planning,wedding photography ,wedding clothes and make-up,wedding Jewry,wedding banquet,and other professional wedding services.The company from the beginning to nowadays ,it almost help more than 10,000 couples do wedding planning and execute the

wedding activities successfully. But this company exist many problems duo to many factors,so I choose this wedding company as my case study,and put forward the shortage of the wedding service now.

2. The Purpose of the Study

7. Discussion

From table the regression about marketing mix affect wedding consumption decision-making,compared the marketing mix about products,the wedding etiquette service has related to wedding consumption decision-making (sig.=.028)

The wedding package service has related to wedding consumption decision-making(sig.=.001).compared the marketing mix about price,the wedding photography price has related to wedding consumption decision making (sig.=.016),and these factors affect wedding consumption decision-making the level of statistical significance is .01

From the 4ps marketing mix,the items of place and promotion are unrelated to wedding consumption decision-making.But the items of product,they are wedding etiquette service and wedding package service related to wedding consumption decision-making. the item of price,it's wedding photography price related to wedding consumption decision-making.the sig. is less then .05

8. Recommendation of the Study

Recommendation from the study of decision making on wedding consumption of GU-PHOTO company in Kunming,wedding service distributors should pay more attention on products and reasonable and negotiable price,company should be available,staffs should have professional knowledge and ability to introduce products with good service to serve customer's demands

9. Suggestion to Further Study

This study selected samplings group from consumers at Kunming district only. Therefore, the future study should select samplings group from different demographic area and bring data to compare and get the results to set a new guideline for benefit of all consumers.
